EDUCATION

Bachelor of Science in Computer Science
University of California, Riverside

Expected Grad Date: December 2025
Sept 2023 - Present
GPA: 3.73

Associate in Science In Computer Science with Great Distinction
Riverside City College

Aug 2021 - June 2023
GPA: 3.9

Honors & Awards
Promise Program Recipient (2021-2023) • Dean's List (2021-2023) • Regents Transfer Scholarship (2023-2024)

Clubs & Activities
Body, Health, and Self-Care Collective (Board Member - Graphic Designer) • Cerebral Beach Hacks 2024 (Hackathon participant) • Cutie Hack 2024 (Hackathon Participant)

PROJECTS

Spotilike - Simple Music Reccomender — Feb 2024 - Mar 2024
Software Construction CS100 │ Skills: C++, Git, Collaborative Project, OOP, VSCode
GitHub: github.com/jewynny/cs100-spring24-group-project
- Collaborated with 3 classmates to develop a simple music playlist application
- Playlist application allowed users to create and edit playlists, through recommendations read from a CSV file
- Utilized Git for version control and Git commands to manage project files and updates
- Applied concepts of Software Development Lifecycle using the agile method Scrum by participating in daily stand-ups and sprint planning

Purely Esther - Website — Oct 2024
Hackathon Submission │ Skills: HTML, CSS, JS, Git, Collaborative, VSCode, Public Speaking, Figma
GitHub: github.com/jewynny/cerebral-hacks-kaliah-janelle
DEVPOST: devpost.com/software/purely-esther
- Developed website with one other teammate in response to challenges in finding cosmetics and skincare products with clean ingredients and ethical sourcing
- Collaborated using kindo.ai (provided tool at hackathon) to streamline coding and front-end development due to limited programming experience
- Prototyped the homepage using Figma to visualize the website design and functionality
- Successfully participated in our first hackathon, developed a prototype, and pitched our idea
- Gained confidence in our ability to collaborate and innovate under pressure

Spotify Aura - Web App — Nov 2024
Hackathon Submission │ Skills: React, JavaScript, Git, Collaborative, VSCode, Public Speaking, Figma
GitHub: github.com/chairfu/spotify-aura
DEVPOST: devpost.com/software/spotify-aura
- Developed an interactive web application, Spotify Aura, with three teammates to create personalized "Aura Images" based on users' Spotify music preferences
- Collaborated using React and Vite to build the platform and utilized the Spotify Web API for user authentication and data retrieval.
- Designed the user interface and aura visualizations in Figma, enhancing aesthetic appeal
- Overcame challenges in API integration and authentication, completing the project within the hackathon 12 hour timeframe
- Delivering a functional prototype and pitched the idea to judges

SKILLS

C++ • Git • Strong Collaborative/Communication Skills • Object Oriented Programming • Creative Basic HTML • Basic CSS • Basic Java Script • VSCode • Public Speaking • Figma
